

Robert Reynolds Bio

Dr. Robert Reynolds is Vice President, Epidemiology in Value, Evidence and Outcomes, part of Research and Development at GSK Pharma. He heads a group of epidemiologists responsible for leading the epidemiologic components of evidence plans supporting drug development and commercialization. He is also an Adjunct Associate Professor of Epidemiology at Tulane School of Public Health and Tropical Medicine. Prior to joining GSK, he was at Pfizer for twenty years, most recently leading Regulatory and Safety Epidemiology. He holds an AB in Biology from Bard College and a MSc in Epidemiology and ScD in Population and International Health from the Harvard School of Public Health. He is a Fellow and former Board member of the International Society for Pharmacoepidemiology. He has participated in multiple international, comparative studies and has published in the areas of pharmacoepidemiologic methods, drug safety, and women's health.
